Education

2019 – 2020	Software Development B.S (Hons): Upper second (2:1) (67%) Manchester Metropolitan University
2017 – 2019	Computing HNC / HND: Merit UCEN Manchester
2014 – 2017	IT Computer Science OCR: Certificate The Manchester College

Summary:

A well-presented, friendly, hardworking, and highly technical individual with a passion for technology, programming and, of course, development. I am a graduate who graduated with a strong upper second in software development. I am currently specializing, working, and developing applications for companies and organizations.

As a developer, I enjoy solving problems and developing substantial, quantitative, and readable code. But also, the way an application is developed such as its design, UI (User Interface), and functionality. I am comfortable working with an agile software development team and giving ideas for development practices.

Technical:

Proficient knowledge in PHP and Java, especially in many different programming languages and technologies such as node.js, Java, HTML5, React.js, vue.js, Python and C#. I do make extensive use of GIT and among other favourable software frameworks. I have been working on web applications during my adolescent years, but I also worked on a couple of software applications.
